Design Company: ISA STEIN Studio
Project Location: Grieskirchen, Austria
Area : 220 m²
Photographer Name: ISA STEIN

The jeweler Jacinta is well known for her creativity and passion for art. Therefore she opened up a gallery together with her brother some years ago. As Grieskirchen is a small city she now created a boutique hotel in order to give art and jewelry lovers a place to stay overnight. As the hotel is rather small, the owners wanted to give every room a different design and therefore

also a different name. They are called "gallery room", "jewelry room", as well as "Vincenz" and "Mathias", the names of her two sons.

The building consists of two floors. On the ground floor there are the foyer and the breakfast room of the hotel, as well as the boutique including a consulting area, the manufactory and a room for the employees. Both areas are

accessible from outside, as well as they are connected inside. There is a staircase situated in the center of the building, which leads you up to the first floor with its four boutique rooms. The room "Mathias" is the smallest one, but it is also the only one providing a balcony.
